Certified GoNano™ contractor

NANO PROTECH

A Quebec company specializing in building protection

Nano Protech is a certified GoNano™ contractor serving residential and commercial property owners in Montreal and the surrounding area. We inspect your roof, tell you honestly whether it can be saved, then apply the right treatment, often in a single visit.

GoNano™ certified

Trained and authorized by the manufacturer. The GoNano warranty requires the treatment to be applied by a certified contractor.

RBQ licensed

Licensed by the Régie du bâtiment du Québec (5726-5878-01).

Honest advice

We only recommend the treatment when it makes sense for your building. If it doesn't, we tell you.

Our service areas

We schedule inspections by area so we can offer you appointments sooner.

Montreal · North Shore · South Shore · West Island

THE TECHNOLOGY BEHIND OUR TREATMENTS

GoNano: technology developed in Quebec

Les Produits GoNano inc., based in Saint-Eustache, develops nanoparticle-based sealants for roofs, concrete and other surfaces.

AS SEEN ON

GoNano presented its technology on *Dans l'œil du dragon* (Radio-Canada) and *Dragons' Den* (CBC).

14 years
of industry experience*

50,000+
satisfied customers*

1 day
to complete an application*

HOW IT WORKS

Nanoparticles that penetrate and strengthen the material

The GoNano sealant penetrates the shingle or membrane instead of just coating it. The nanoparticles strengthen the material's structure, and some formulas add bio-based oils that restore its flexibility.

1 · PENETRATES

Soaks into the material

The product penetrates the surface and makes it water-repellent: water beads and runs off instead of soaking in.

2 · REGENERATES

Rebuilds bonds

The treatment creates new bonds in the aged material and restores its flexibility.

3 · PROTECTS

Slows aging

It reflects UV rays, limits heat absorption and protects against wear.

What the treatment protects against*

- **Water, snow and ice:** a water-repellent surface that helps runoff
- **Freeze-thaw:** fills the membrane's micro-cracks
- **Heat and UV:** less fading and aging
- **Hail:** treated shingles rated UL 2218 Class 4, according to GoNano
- **High winds:** more flexibility, less risk of tearing
- **Algae and erosion:** a barrier against surface wear

TREAT OR REPLACE?

Same roof. Two realities.

Full replacement

- Shingle tear-off and a debris dumpster
- Several days of work
- Noise, dust and disruption
- Old shingles sent to the landfill

GoNano treatment

- No tear-off: we protect your existing roof
- Repairs, cleaning and caulking done first if needed
- Applied in a single day, often in about 1 hour
- No dust, no odour
- Less waste, longer roof life

80%

less than a full replacement

You get the exact price of your treatment during the free inspection, based on your roof's size, pitch and condition.

* Performance as stated by the manufacturer, GoNano. Each roof's eligibility is confirmed at inspection.

THE NUROOF LINE

A treatment for every age of asphalt shingle roof

During the inspection, we assess the age and condition of your shingles to choose the right product.

PREVENTION

NuRoof Fortify

Newer roofs · under 5 years

Protects the shingle before damage appears and helps retain granules.

up to 20 years *

MOST POPULAR

NuRoof Revive

Aging shingles · 6 to 20 years

Restores the shingle and creates a water-repellent barrier against water, algae and erosion.

up to 12 years *

BUDGET

NuRoof Boost

Roofs starting to age

An affordable option to slow aging and shed water.

up to 10 years *

* Protection period stated by GoNano for a full treatment.

The result on a real roof

Same roof, same rain. On the left, the untreated shingle holds water in place. On the right, the shingle treated with NuRoof Revive sheds water to the ground.

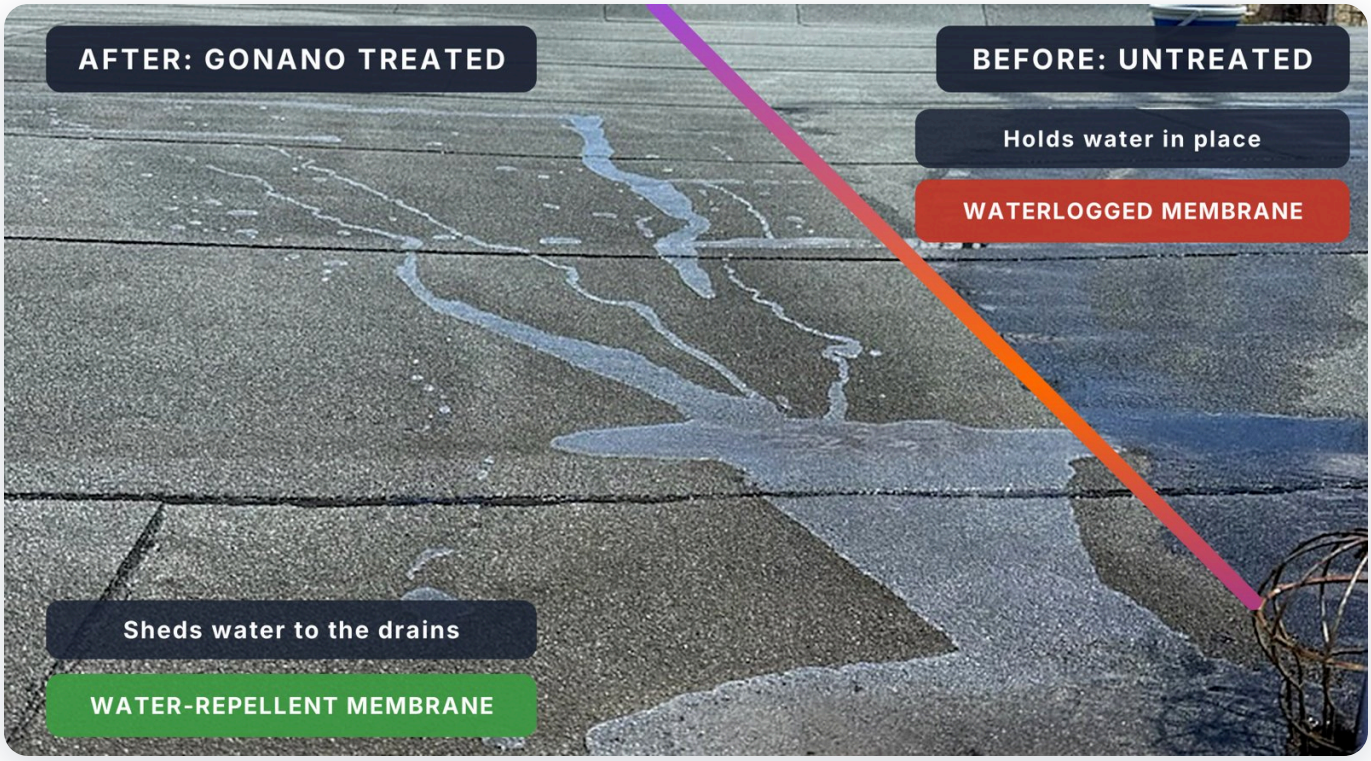

Real photo of a shingle roof partly treated with NuRoof Revive. No water drops added.

FLAT ROOFS · COMMERCIAL AND RESIDENTIAL

Elastomeric membrane

The GoNano nano-sealant rejuvenates elastomeric membranes on flat roofs. It fills micro-cracks, makes the membrane water-repellent and reflects UV rays. The manufacturer states a life extension of 10 to 15 years.

Real photo of a flat roof. Left of the line, the treated membrane sheds water to the drains. On the right, the untreated membrane holds water.

AVAILABLE

Nano Concrete · Concrete surfaces

For driveways, steps, slabs and foundations. The sealant penetrates the concrete and forms a barrier against water and moisture.

- Protects against freeze-thaw damage
- Keeps de-icing salt from penetrating
- Up to 10 years of protection, according to GoNano

COMING SOON

Nano Windows · Windows

A window membrane is coming soon to Nano Protech, to better protect your glazing and improve your building's comfort all year round.

Ask to join the waiting list and be among the first to hear about the launch.

HOW IT WORKS

Simple, fast, no surprises

1

Booking

You choose a time slot in your area's calendar, online or by phone.

2

Free inspection

30 minutes on site. We check the roof's condition and warranty eligibility, then give you the price.

3

Preparation

Before treating, we make any needed repairs, clean the roof and redo the caulking if necessary.

4

Application

If the roof is eligible and the weather allows, the treatment can be done on the spot (about 1 hour).

5

Warranty

You pay when the work is done and receive your written GoNano warranty.

We send you a reminder the day before and two hours before your appointment. Please clear the driveway so we can reach the roof and park our truck.

Written GoNano warranty

- Written warranty, **transferable** to the next owner
- Term depends on the system and extent of treatment, up to 20 years
- Valid when the treatment is applied by a certified GoNano contractor

The exact terms are provided with your quote.

Referral program

Know someone whose roof deserves protection? Give them your referral code: you get **$100** when their treatment is completed.

Frequently asked questions

Is my roof eligible? We confirm it for free at the inspection.
What if it rains? We only apply in dry weather and reschedule if needed.

Can your roof still be saved?

Book your free 30-minute inspection. We'll tell you honestly whether the treatment is worth it for your building.
